

Program:

```
import 'package:flutter/material.dart';

void main(){
  runApp(MyApp());
}

class MyApp extends StatelessWidget {
  const MyApp({super.key});

  @override
  Widget build(BuildContext context) {
    return MaterialApp(
      debugShowCheckedModeBanner: false,
      home: Text("Hello Avi",textAlign: TextAlign.center,style: TextStyle(backgroundColor: Colors.purple ,
fontFamily: 'TimesNewRoman')),
    );
  }
}
```

Output:
